DETAILED ACTION

Status of the Application

Claims 1-27 are pending in the application.

Applicants amendment to claims 6, 21, 24, and 26 in Paper No. 5 is acknowledged.

Lack of Unity

1. Lack of unity is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claim(s) 1-17 and 24-27, drawn to a method of modifying a substrate material by a bacterial culture that is active in said substrate and is not susceptible to attack by bacteriophage.

Group II, claim(s) 18-23, drawn to a modified lactic acid bacterium.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reason: the methods as set forth in claims 1-3, 8-11, and 26 were known in the prior art (see the Search Report reference of Richardson et al. *J Dairy Sci* 66:2278-2286). Richardson et al. discloses the methods as encompassed by claims 1-3, 8-11, and 26 and thus, the above invention, when considered as a whole does not contribute over the prior art.

3. Because these inventions are distinct for the reason given above, restriction for examination purposes as indicated is proper.

Conclusion

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named

Art Unit: 1652

inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
